

Your new cost effective virtual recruiting solution for now and the future!

PVSR Resources meet the needs of today's growing Pharmaceutical, Medical Devices and Biotechnology Industries by providing highly skilled employees. We will provide you with resources from Engineering, Chemistry, Microbiology, Biology, IT Technology fields or even for your plant's operations or maintenance. We can be your head hunter source or you may contract them through PVSR Corporation. We can provide you with temporary or regular resources. We do it right the first time. In addition to a comprehensive pre-hire evaluation process, all our employees must complete a mandatory certification program. Our industry-leading selection and training methods ensure you will receive a skilled, competent employee right from the start. In order to find adequate personnel we have designed a virtual recruitment system. This system assists us from beginning to end in the recruitment process. As it is of world-wide knowledge, the Internet is the most popular search tool for any cost effective article or service.

As part of this tendency PVSR developed a virtual recruiter: our web portal **WWW.PVSRJOBS.COM**. Here the candidates who visit us, see all available positions from our clients and can place his or her resume by applying to a job or by simply posting their resume. The system performs a preliminary screening asking basic questions and according to the answers of the candidates, it classifies their resume. If the candidate qualifies for the job, then we begin the recruitment process. We perform interviews and measure the candidate's capacity and aptitude according to the necessities of the client. Then we send to the client's hiring manager the candidate's resume to be evaluated and schedule an interview electronically. All these task are performed paperless using our virtual recruiting system.
